

**1. Title**

The Soil Health: Human Health Nexus

**2. Type**

Inter-Divisional Symposium

**3. Organizer(s) & Convener**

Dr Pepper

Director, Environmental Research Lab

University of Arizona

Tel: 520 626 3328

Fax: 520 573 0852

Email: [ipepper@ag.arizona.edu](mailto:ipepper@ag.arizona.edu)

**4. Rationale**

Soils can beneficially or adversely affect human health, and likewise human activity can improve or destroy soil health. In the new anthropogenic era, it is worth examining the soil health: human health nexus.

**5. Objectives**

Presentations will discuss the positive and negative impact of soils on human health. The objective is to look at soil from a transdisciplinary role.

**6. Description**

In this symposium we will evaluate soil from the perspective of: what infects us; what heals us; what contaminates us; what nourishes us; and what we breathe.
